| Middle Session 11:50am - 12:50pm Mathematics - This week's topic - 3D Objects | This week's topic - 3D Objects 3D objects are shapes with three dimensions, such as width, height and depth. An example of a 3D shape is a prism or a sphere. 3D shapes are multidimensional and can be physically held. <ul style="list-style-type: none"> Watch the activities on seesaw for 3D objects. Complete the 1st worksheet in your work booklet on 3D objects | This week's topic - 3D Objects The main difference between 2D shapes and 3D objects are their dimensions. A 2D shape (two-dimensional) only has length and height as the dimensions. 2D shapes are flat, while 3D objects take up more space in three dimensions. <ul style="list-style-type: none"> Watch the activities on seesaw for 3D objects. Complete the 2nd worksheet in your work booklet on 3D objects | This week's topic - 3D Objects Different 3-dimensional objects include cubes, pyramids, spheres, and cones. You can find examples of 3D shapes in the world all around us. <ul style="list-style-type: none"> Watch the activities on seesaw for 3D objects. Complete the 3rd worksheet in your work booklet on 3D objects | This week's topic - 3D Objects All three-dimensional objects are different but have three primary properties in common. These main 3D shape properties include: * Faces: A face is a flat or curved surface on a 3D shape. For example, a cube has six faces, a cylinder has three and a sphere has just one. * Edges: An edge is where two faces meet. For example, a cube has 12 edges, a cylinder has two and a sphere has none. * Vertices: A vertex is a corner where edges meet. The plural is vertices. For example, a cube has eight vertices, a cone has one vertex and a sphere has none. <ul style="list-style-type: none"> Watch the activities on seesaw for 3D objects Complete the 4th worksheet in your booklet on 3D objects | This week's topic - 3D Objects Now that you are very clever at recognising the difference between 2D shapes and 3D objects, can you explain to a grown up what those differences are and find some examples in your home. <ul style="list-style-type: none"> Watch the activities on seesaw for 3D objects. Complete the 5th worksheet in your work booklet on 3D objects which is a fun box activity. You will need an empty cardboard box, some spare sheets of paper, glue and a marker. Make sure you upload a photo of your box and all its faces to seesaw for your teacher. |
